DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bill Frommer on 2/13/09.

The application has been amended as follows:

In the claims

Cancel claim 37.

Add new claim 37 as follows:

37. A method of encoding input video data, comprising the steps of:
- providing input video data exhibiting a particular frame frequency converted from a second frame frequency;
 - counting fields in the input video data of said particular frame frequency to produce a count;
 - converting the input video data having said particular frame frequency into video data with said second frame frequency;
 - encoding, by an encoding unit, the converted video data to generate an elementary stream;

including, in said elementary stream, picture order information about a picture order of said elementary stream;

the encoding unit performing the further step of generating said picture order information based on the counted fields; said picture order information including a presentation time stamp count corresponding to the field count and a decoding time stamp count representing decoding times for the pictures of said elementary stream;

packetizing said elementary stream with said presentation and decoding time stamp counts;

extracting from said input video data information representing number of lines corresponding to a vertical start position of an active video area and number of samples corresponding to a horizontal start position of said active video area; and

supplying the extracted information to a controller thereby supplying unique information pertaining to V-phase and H-phase positioning of said active video area.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Kato (US 5675379) discloses an apparatus that relates to encoding picture signals (Kato: column 1, lines 7-10). This apparatus comprises "counting fields in the input video data having a particular frame frequency" (Kato: column 7, lines 38-44), "converting the input video having the particular frame frequency into video data with a

second frame frequency" (Kato: column 6, lines 1-35), and "encoding the video data to generate a stream" (Kato: figure 6). However, Kato fails to disclose the picture order information and the extracting means as claimed. Kato further fails to disclose generating a PTS and DTS based on the counted fields. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID CZEKAJ whose telephone number is (571)272-7327. The examiner can normally be reached on Mon-Thurs and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
